I have been using Onenote (on my mac) for just under a year now and have had up to 4 full university papers worth of lecture notes (including slides) uploaded to my Onenote.. I now only have 3 papers (which are only half completed) on my one drive and syncing has stopped because it says I am out of cloud storage.. Premium features are available to paid customers The OneNote service now provides a cloud API enabling any application to connect to it.. As many of you have attested, OneNote is the ultimate extension for your brain, but it's not complete if it's not instantly available everywhere.

Less No matter what version of OneNote you use, you can download a copy of any of your OneNote notebooks to your PC or Mac — either as a backup or to upload its contents to.. Personally I use them both, and with the cloud storage It's nice having them synchronize between platforms.. But there was still a gap People frequently asked us for OneNote on Mac, and for more ways to capture content.
